Project Management Training

The Perfect Project - 2 day training programme

This 2 day project management event takes participants from an original idea through to project delivery.

We use a 5 stage model to help people deliver projects and use a case study to develop both their knowledge and their skills. The course is tried and tested and very practical. We have the following objectives for the event:

AIM: To build on and further develop project management skills

OBJECTIVES: At the end of the training you will be able to:

- use a standardised framework for defining, planning and controlling projects
- recognise the role(s) you play and define other people's contribution to Project Management process
- recognise and reduce risks within all types of project work
- use a range of tools with wide application

"The trainer was excellent, very knowledgeable, clear, helpful and the techniques he used were great."
